

# Orodha ya kuangalia upya wa Ubunifu na Ujenzi

© SBSE @ Tadoussac 1999 Translated by DM Ogoli

## Mradi

|                 |   | Zorotesha      |                 |                   |                 | Endelevu     |                | Kuzaliwa Upya    |                |                 |  |
|-----------------|---|----------------|-----------------|-------------------|-----------------|--------------|----------------|------------------|----------------|-----------------|--|
|                 |   | -100 Mara Zote | -75 Mara Kadhaa | -50 Mara Kwa Mara | -25 Mara Chache | 0 (Ma) Salio | 25 Mara Chache | 50 Mara kwa Mara | 75 Mara Kadhaa | 100 Mara Zote   |  |
| Eneo            | inachafua hewa                          |                |                 |                   |                 |              |                |                  |                |                 | inasafisha hewa                          |
|                 | inachafua maji                          |                |                 |                   |                 |              |                |                  |                |                 | inasafisha maji                          |
|                 | inapoteza maji ya mvua                  |                |                 |                   |                 |              |                |                  |                |                 | inahifadhi maji ya mvua                  |
|                 | inatumia chakula                        |                |                 |                   |                 |              |                |                  |                |                 | inzalisha chakula                        |
|                 | inaharibu mchanga wenye rutuba          |                |                 |                   |                 |              |                |                  |                |                 | inaunda mchanga wenye rutuba             |
|                 | inatupa takataka kabla haijatumika      |                |                 |                   |                 |              |                |                  |                |                 | inatumia takataka                        |
|                 | inaharibu makazi ya wanyama wa porini   |                |                 |                   |                 |              |                |                  |                |                 | inapeana makazi ya wanyama wa porini     |
|                 | inaagiza nishati                        |                |                 |                   |                 |              |                |                  |                |                 | inauza nishati                           |
|                 | inahitaji usafirishaji unatumia nishati |                |                 |                   |                 |              |                |                  |                |                 | inahitaji usafirishaji usiotumia nishati |
|                 | inazorotesha hali ya hewa ya eneo       |                |                 |                   |                 |              |                |                  |                |                 | inaimarisha vyema hali ya hewa ya eneo   |
| Jengo           | inazuia mwanga wa mchana                |                |                 |                   |                 |              |                |                  |                |                 | inatumia mwanga wa mchana                |
|                 | inatumia mitambo kuzalisha joto         |                |                 |                   |                 |              |                |                  |                |                 | inatumia joto kutoka nje                 |
|                 | inatumia mitambo kuzalisha baridi       |                |                 |                   |                 |              |                |                  |                |                 | inatumia baridi kutoka nje               |
|                 | inahitaji kusafishwa na ukarabati       |                |                 |                   |                 |              |                |                  |                |                 | inajitegemea                             |
|                 | inasumbua binadamu                      |                |                 |                   |                 |              |                |                  |                |                 | inaliwaza binadamu                       |
|                 | inatumia mzunguko wa nguvu za nishati   |                |                 |                   |                 |              |                |                  |                |                 | inatumia mzunguko wa nguvu za kibinadamu |
|                 | inachafua hewa ya ndani                 |                |                 |                   |                 |              |                |                  |                |                 | inasafisha hewa ya ndani                 |
|                 | imejengwa kwa vifaa visivyo vya sindika |                |                 |                   |                 |              |                |                  |                |                 | imejengwa na vifaa vya kusindika         |
|                 | haiwezi kusindika                       |                |                 |                   |                 |              |                |                  |                |                 | inaweza kusindika                        |
|                 | ni mfano mwema wa kuiga                 |                |                 |                   |                 |              |                |                  |                |                 | ni mfano mwema wa kuzaliwa upya          |
| ni jirani mbaya |   |                |                 |                   |                 |              |                |                  |                | ni jirani mwema |  |
| haipendezi      |   |                |                 |                   |                 |              |                |                  |                | inapendeza      |  |

|                                |                                  |
